Job Description:

Job Profile:-

We're in search of a Back-End Software Engineer that specializes in server-side components. In this role, you'll primarily work on Node JS, Mongo DB, Redis, building scalable products and will bring a depth of knowledge on algorithms and data structures. As a Back-End Software Engineer, on any given day you might be architecting new features for our customers, refactoring.

Typical work week look like:-

- Collaborating with the front-end developers and other team members to establish objectives and design more functional, cohesive codes to enhance the user experience.
- Design and implementation of scalable applications by using asynchronous programming with low-latency, high-availability, and performant applications between multiple systems, servers, and environments.
- Integration of data storage solutions by creating database schemas that represent and support business processes and also Integrating multiple data sources and databases into one system.
- Building reusable code and libraries for future use.
- Explore technical innovation and propose new solutions as and when required.
- Work with engineers, product managers and senior leadership to turn our product and technical vision into a tangible roadmap every month.

Our ideal candidate should have:-

- Relevant internship experience in a Tech Startup
- A solid grounding in Computer Science fundamentals (based on B.Tech in Computer Science)
- Strong proficiency with JavaScript and knowledge of Node.js and frameworks.
- Strong hands on MongoDB and ability to write aggregation queries.
- Basic understanding of front-end technologies, such as HTML5, and CSS3.
- Hands-on on code versioning tools, such as Git, Redis, AWS, Sockets

**What you can expect from ORI:-**

- Passion & happiness in the workplace with great people & open culture with amazing growth opportunities.
- An ecosystem where leadership is fostered which builds an environment where everyone is free to take necessary actions to learn from real experiences.
- Chance to work on the cutting edge of technology.
- Freedom to pursue your ideas and tinker with multiple technologies- which a techie would definitely enjoy!!
- 5 days a week working with flexible working hours (Hybrid working)
- Group Medical Insurance coverage for you & your family
- Fun Filled working environment with great co-workers.

If you have outstanding programming skills and a great passion for developing beautiful, innovative applications, then you will love this job.
